

Amendment to the Specification

Please amend the above-captioned application by deleting the paper sequence listing filed with and published as part of the international phase of this application, and substitute the 17-page paper sequence listing that accompanies this paper.

The sequence information contained in the accompanying 17-page sequence listing is identical to that appearing in the international publication (WO 03/104479 A2) of this application, however the application information on page 1 has been updated and the name of a corporate applicant has been removed.
